Senoko Energy Wins Inaugural Singapore Energy Award - strong performance in community outreach and innovation

Singapore, 28 October 2013 – The tour bus pulls up at the front porch of Senoko Power Station. Excited students spill out of the bus to be met by Senoko staff members, who will be their guides during their visit to the power plant. During this visit, these students will have a closer look at how electricity is generated from natural gas.

Plant visits, partnership with schools and competitions are some of the ways in which Senoko Energy works with the school community. Senoko Energy has been a strong supporter of NEA's CASP (Corporate and School Partnership Programme) since 2004, and runs its own climate and sustainability-focused competition called the Senoko Sustainability Challenge.

In terms of innovation, Senoko Energy was the first in Singapore to import natural gas for power generation, to adopt combined cycle technology, and to use the "repowering" concept to renew its plant portfolio.

Brendan Wauters, President & CEO of Senoko Energy, expressed his delight at the award: "We are very happy and humbled to receive the inaugural Singapore Energy Award. I believe this is a reward for the consistency of the effort in terms of community outreach and innovation which the Senoko Energy teams have shown over many years.. To all of them, and to our partners who have been with us on our journey, I want to say thank you for a job well done!"

The Singapore Energy Award caps an eventful year for Senoko Energy. In February, it celebrated the completion of its Stage 2 Repowering Project. At the same time it launched the Senoko Energy Scholarship program for ITE graduates. In August, its Senoko Sustainability Challenge 2013 ended on a high note with the Minister for Education giving out prizes to the winners.

"The most gratifying part about school outreach is the interaction with the students. I too get inspiration from their enthusiasm. Some of them still send me cards after leaving their schools. "

- Mr Kwong Kok Chan, Vice President (Environment & Special Projects),
Senoko Energy Pte Ltd

"Senoko Energy indeed is a good role model of a corporation going the extra mile to heighten the environment conservation knowledge in schools."
